1. Introduction to this report

This report presents the findings of the 2017 national NHS staff survey conducted in Lincolnshire Community Health Services NHS Trust.

In section 2 of this report, we present an overall indicator of staff engagement. Full details of how this indicator was created can be found in the document *Making sense of your staff survey data*, which can be downloaded from [www.nhsstaffsurveys.com](http://www.nhsstaffsurveys.com).

In sections 3, 4, 6 and 7 of this report, the findings of the questionnaire have been summarised and presented in the form of 32 Key Findings.

In section 5 of this report, the data required for the Workforce Race Equality Standard (WRES) is presented.

These sections of the report have been structured thematically so that Key Findings are grouped appropriately. There are nine themes within this report:

- Appraisals & support for development
- Equality & diversity
- Errors & incidents
- Health and wellbeing
- Working patterns
- Job satisfaction
- Managers
- Patient care & experience
- Violence, harassment & bullying

Please note, two Key Findings have had their calculation changed and there have been minor changes to the benchmarking groups for social enterprises since last year. For more detail on these changes, please see the *Making sense of your staff survey data* document.

As in previous years, there are two types of Key Finding:

- percentage scores, i.e. percentage of staff giving a particular response to one, or a series of, survey questions
- scale summary scores, calculated by converting staff responses to particular questions into scores. For each of these scale summary scores, the minimum score is always 1 and the maximum score is 5

Responses to the individual survey questions can be found in Appendix 3 of this report, along with details of which survey questions were used to calculate the Key Findings.
Your Organisation

The scores presented below are un-weighted question level scores for questions Q21a, Q21b, Q21c and Q21d and the un-weighted score for Key Finding 1. The percentages for Q21a – Q21d are created by combining the responses for those who “Agree” and “Strongly Agree” compared to the total number of staff that responded to the question.

Q21a, Q21c and Q21d feed into Key Finding 1 “Staff recommendation of the organisation as a place to work or receive treatment”.

</table>
2. Overall indicator of staff engagement for Lincolnshire Community Health Services NHS Trust

The figure below shows how Lincolnshire Community Health Services NHS Trust compares with other community trusts on an overall indicator of staff engagement. Possible scores range from 1 to 5, with 1 indicating that staff are poorly engaged (with their work, their team and their trust) and 5 indicating that staff are highly engaged. The trust’s score of 3.85 was above (better than) average when compared with trusts of a similar type.

**OVERALL STAFF ENGAGEMENT**

![Graph showing staff engagement scores](graph.png)

This overall indicator of staff engagement has been calculated using the questions that make up Key Findings 1, 4 and 7. These Key Findings relate to the following aspects of staff engagement: staff members’ perceived ability to contribute to improvements at work (Key Finding 7); their willingness to recommend the trust as a place to work or receive treatment (Key Finding 1); and the extent to which they feel motivated and engaged with their work (Key Finding 4).

The table below shows how Lincolnshire Community Health Services NHS Trust compares with other community trusts on each of the sub-dimensions of staff engagement, and whether there has been a significant change since the 2016 survey.

<table>
<thead>

</tbody>
</table>

Full details of how the overall indicator of staff engagement was created can be found in the document *Making sense of your staff survey data.*
3. Summary of 2017 Key Findings for Lincolnshire Community Health Services NHS Trust

3.1 Top and Bottom Ranking Scores

This page highlights the five Key Findings for which Lincolnshire Community Health Services NHS Trust compares most favourably with other community trusts in England.

**TOP FIVE RANKING SCORES**

✓ KF31. Staff confidence and security in reporting unsafe clinical practice

*(the higher the score the better)*

<table>
<thead>
<tr>
<th>Scale summary score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Trust score 2017</td>
</tr>
<tr>
<td>3.87</td>
</tr>
<tr>
<td>National 2017 average for community trusts</td>
</tr>
<tr>
<td>3.80</td>
</tr>
</tbody>
</table>

✓ KF11. Percentage of staff appraised in last 12 months

*(the higher the score the better)*

<table>
<thead>
<tr>
<th>Percentage score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Trust score 2017</td>
</tr>
<tr>
<td>94%</td>
</tr>
<tr>
<td>National 2017 average for community trusts</td>
</tr>
<tr>
<td>91%</td>
</tr>
</tbody>
</table>

✓ KF25. Percentage of staff experiencing harassment, bullying or abuse from patients, relatives or the public in last 12 months

*(the lower the score the better)*

<table>
<thead>
<tr>
<th>Percentage score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Trust score 2017</td>
</tr>
<tr>
<td>22%</td>
</tr>
<tr>
<td>National 2017 average for community trusts</td>
</tr>
<tr>
<td>23%</td>
</tr>
</tbody>
</table>

✓ KF29. Percentage of staff reporting errors, near misses or incidents witnessed in the last month

*(the higher the score the better)*

<table>
<thead>
<tr>
<th>Percentage score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Trust score 2017</td>
</tr>
<tr>
<td>94%</td>
</tr>
<tr>
<td>National 2017 average for community trusts</td>
</tr>
<tr>
<td>93%</td>
</tr>
</tbody>
</table>

✓ KF14. Staff satisfaction with resourcing and support

*(the higher the score the better)*

<table>
<thead>
<tr>
<th>Scale summary score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Trust score 2017</td>
</tr>
<tr>
<td>3.39</td>
</tr>
<tr>
<td>National 2017 average for community trusts</td>
</tr>
<tr>
<td>3.30</td>
</tr>
</tbody>
</table>
For each of the 32 Key Findings, the community trusts in England were placed in order from 1 (the top ranking score) to 17 (the bottom ranking score). Lincolnshire Community Health Services NHS Trust’s five lowest ranking scores are presented here, i.e. those for which the trust’s Key Finding score is ranked closest to 17. Further details about this can be found in the document *Making sense of your staff survey data*.

**BOTTOM FIVE RANKING SCORES**

**KF20. Percentage of staff experiencing discrimination at work in the last 12 months**

*(the lower the score the better)*

<table>

</tr>
</tbody>
</table>
3.2 Largest Local Changes since the 2016 Survey

This page highlights the five Key Findings where staff experiences have improved at Lincolnshire Community Health Services NHS Trust since the 2016 survey.

**WHERE STAFF EXPERIENCE HAS IMPROVED**

- **KF8. Staff satisfaction with level of responsibility and involvement**
  
  *(the higher the score the better)*
  
<table>
<thead>
<tr>
<th>Scale summary score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Trust score 2017</td>
</tr>
<tr>
<td>3.88</td>
</tr>
<tr>
<td>Trust score 2016</td>
</tr>
<tr>
<td>3.72</td>
</tr>
</tbody>
</table>

- **KF32. Effective use of patient / service user feedback**
  
  *(the higher the score the better)*
  
<table>
<thead>
<tr>
<th>Scale summary score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Trust score 2017</td>
</tr>
<tr>
<td>3.69</td>
</tr>
<tr>
<td>Trust score 2016</td>
</tr>
<tr>
<td>3.44</td>
</tr>
</tbody>
</table>

- **KF5. Recognition and value of staff by managers and the organisation**
  
  *(the higher the score the better)*
  
<table>
<thead>
<tr>
<th>Scale summary score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Trust score 2017</td>
</tr>
<tr>
<td>3.53</td>
</tr>
<tr>
<td>Trust score 2016</td>
</tr>
<tr>
<td>3.30</td>
</tr>
</tbody>
</table>

- **KF14. Staff satisfaction with resourcing and support**
  
  *(the higher the score the better)*
  
<table>
<thead>
<tr>
<th>Scale summary score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Trust score 2017</td>
</tr>
<tr>
<td>3.39</td>
</tr>
<tr>
<td>Trust score 2016</td>
</tr>
<tr>
<td>3.15</td>
</tr>
</tbody>
</table>
Because the Key Findings vary considerably in terms of subject matter and format (e.g. some are percentage scores, others are scale scores), a straightforward comparison of score changes is not the appropriate way to establish which Key Findings have improved the most. Rather, the extent of 2016-2017 change for each Key Finding has been measured in relation to the national variation for that Key Finding. Further details about this can be found in the document *Making sense of your staff survey data*.

**KF10. Support from immediate managers**

(*the higher the score the better*)

<table>
<thead>
<tr>
<th>Scale summary score</th>
<th>Unsupportive managers</th>
<th>Supportive managers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Trust score 2017</td>
<td>3.85</td>
<td></td>
</tr>
<tr>
<td>Trust score 2016</td>
<td>3.69</td>
<td></td>
</tr>
</tbody>
</table>
3.2. Summary of all Key Findings for Lincolnshire Community Health Services NHS Trust

**KEY**
- Green = Positive finding, e.g. there has been a statistically significant positive change in the Key Finding since the 2016 survey.
- Red = Negative finding, e.g. there has been a statistically significant negative change in the Key Finding since the 2016 survey.
- Grey = No change, e.g. there has been no statistically significant change in this Key Finding since the 2016 survey.

For most of the Key Finding scores in this table, the higher the score the better. However, there are some scores for which a high score would represent a negative finding. For these scores, which are marked with an asterisk and in italics, the lower the score the better.

4. Key Findings for Lincolnshire Community Health Services NHS Trust

Lincolnshire Community Health Services NHS Trust had 1008 staff take part in this survey. This is a response rate of 60%\(^1\) which is above average for community trusts in England (50%), and compares with a response rate of 59% in this trust in the 2016 survey.

This section presents each of the 32 Key Findings, using data from the trust's 2017 survey, and compares these to other community trusts in England and to the trust's performance in the 2016 survey. The findings are arranged under nine themes: appraisals and support for development, equality and diversity, errors and incidents, health and wellbeing, working patterns, job satisfaction, managers, patient care and experience, and violence, harassment and bullying.

Positive findings are indicated with a green arrow (e.g. where the trust is better than average, or where the score has improved since 2016). Negative findings are highlighted with a red arrow (e.g. where the trust's score is worse than average, or where the score is not as good as 2016). An equals sign indicates that there has been no change.

### Appraisals & support for development

**KEY FINDING 11. Percentage of staff appraised in last 12 months**

<table>
<thead>
<tr>

</tbody>
</table>

\(^1\)Questionnaires were sent to all 1684 staff eligible to receive the survey. This includes only staff employed directly by the trust (i.e. excluding staff working for external contractors). It excludes bank staff unless they are also employed directly elsewhere in the trust. When calculating the response rate, questionnaires could only be counted if they were received with their ID number intact, by the closing date.
KEY FINDING 13. Quality of non-mandatory training, learning or development

6. Key Findings by work group characteristics

Tables 6.1 to 6.4 show the Key Findings at Lincolnshire Community Health Services NHS Trust broken down by work group characteristics: occupational groups, locations, and full time/part time staff.

Technical notes:

- As in previous years, there are two types of Key Finding:
  - percentage scores, i.e. percentage of staff giving a particular response to one, or a series of, survey questions
  - scale summary scores, calculated by converting staff responses to particular questions into scores. For each of these scale summary scores, the minimum score is always 1 and the maximum score is 5

- For most of the Key Findings presented in tables 6.1 to 6.4, the higher the score the better. However, there are some Key Findings for which a high score would represent a negative result. For these Key Findings, marked with an asterisk and shown in italics, the lower the score the better.

- Care should be taken not to over interpret the findings if scores differ slightly. For example, if for 'KF11. % appraised in the last 12 months' staff in Group A score 45%, and staff in Group B score 40%, it may appear that a higher proportion of staff in Group A have had appraisals than staff in Group B. However, because of small numbers in these sub-groups, it is probably not statistically significant. A more sensible interpretation would be that, on average, similar proportions of staff in Group A and B have had appraisals.

- Please note that, unlike the overall trust scores, data in this section are not weighted.

- Please also note that all percentage scores are shown to the nearest 1%. This means scores of less than 0.5% are displayed as 0%.

- In order to preserve anonymity of individual staff, a score is replaced with a dash if the staff group in question contributed fewer than 11 responses to that score.

$^a$ Full time is defined as staff contracted to work 30 hours or more a week
7. Key Findings by demographic groups

Tables 7.1 and 7.2 show the Key Findings at Lincolnshire Community Health Services NHS Trust broken down by different demographic groups: age group, gender, disability and ethnic background.

Technical notes:

- As in previous years, there are two types of Key Finding:
  - percentage scores, i.e. percentage of staff giving a particular response to one, or a series of, survey questions
  - scale summary scores, calculated by converting staff responses to particular questions into scores. For each of these scale summary scores, the minimum score is always 1 and the maximum score is 5

- For most of the Key Findings presented in tables 7.1 and 7.2, the higher the score the better. However, there are some Key Findings for which a high score would represent a negative result. For these Key Findings, marked with an asterisk and shown in italics, the lower the score the better.

- Care should be taken not to over interpret the findings if scores differ slightly. For example, if for 'KF11. % appraised in the last 12 months' staff in Group A score 45%, and staff in Group B score 40%, it may appear that a higher proportion of staff in Group A have had appraisals than staff in Group B. However, because of small numbers in these sub-groups, it is probably not statistically significant. A more sensible interpretation would be that, on average, similar proportions of staff in Group A and B have had appraisals.

- Please note that, unlike the overall trust scores, data in this section are not weighted.

- Please also note that all percentage scores are shown to the nearest 1%. This means scores of less than 0.5% are displayed as 0%.

- In order to preserve anonymity of individual staff, a score is replaced with a dash if the demographic group in question contributed fewer than 11 responses to that score.

Appendix 1

Key Findings for Lincolnshire Community Health Services NHS Trust benchmarked against other community trusts

Technical notes:

- The first column in table A1 shows the trust's scores for each of the Key Findings. The same data are displayed in section 3 and 4 of this report.

- The second column in table A1 shows the 95% confidence intervals around the trust's scores for each of the Key Findings.

- The third column in table A1 shows the average (median) score for each of the Key Findings for community trusts. The same data are displayed in section 3 and 4 of this report.

- The fourth and fifth columns in table A1 show the thresholds for below and above average scores for each of the Key Findings for community trusts. The data are used to describe comparisons with other trusts as displayed in section 3 and 4 of this report.

- The sixth column in table A1 shows the lowest score attained for each of the Key Findings by an community trust.

- The seventh column in table A1 shows the highest score attained for each of the Key Findings by an community trust.

- For most of the Key Findings presented in table A1, the higher the score the better. However, there are some Key Findings for which a high score would represent a negative score. For these Key Findings, marked with an asterisk and shown in italics, the lower the score the better.

- Please note that the data presented in table A1 are rounded to the nearest whole number for percentage scores and to two decimal places for scale summary scores.

Appendix 2

Changes to the Key Findings since the 2015 and 2016 staff surveys

Technical notes:

- For most of the Key Findings presented in tables A2.1 and A2.2, the higher the score the better. However, there are some Key Findings for which a high score would represent a negative result. For these Key Findings, marked with an asterisk and shown in italics, the lower the score the better.

- It is likely that we would see some small change simply due to sample differences between the two years. The final column of the tables shows whether the change in your trust is statistically significant or not. If a change is not significant, then there is no evidence of a real change in the trust score.

- Please note that the trust scores and change scores presented in tables A2.1 and A2.2 are rounded to the nearest whole number for percentage scores and to two decimal places for scale summary scores.

- All percentage scores are shown to the nearest 1%. This means scores of less than 0.5% are displayed as 0%.

- In certain cases a dash (-) appears in Table A2.2. This is either because the Key Finding was not calculated in previous years, or there have been changes in how the Key Finding has been calculated this year.

Appendix 3

Data tables: 2017 Key Findings and the responses to all survey questions

For each of the 32 Key Findings (Table A3.1) and each individual survey question in the core version of the questionnaire (Table A3.2), this appendix presents your trust’s 2017 survey response, the average (median) 2017 response for community trusts, and your trust’s 2016 survey response (where applicable).

In Table A3.1, the question numbers used to calculate the 32 Key Findings are also listed in the first column.

In Table A3.2, the responses to the survey questions are presented in the order that they appear within the core version of the 2017 questionnaire.

Technical notes:

- In certain cases a dash (-) appears in Tables A3.1 or A3.2. This is in order to preserve anonymity of individual staff, where there were fewer than 11 responses to a survey question or Key Finding.

- Please note that the figures reported in tables A3.1 and A3.2 are un-weighted, and, as a consequence there may be some slight differences between these figures and the figures reported in sections 3 and 4 and Appendix 2 of this report, which are weighted according to the occupational group profile of a typical community trust.

- The question data within this section excludes any non-specific responses (‘Don’t know’/’Can’t remember’).

- More details about the calculation of Key Findings and the weighting of data can be found in the document *Making sense of your staff survey data*, which can be downloaded from: [www.nhsstaffsurveys.com](http://www.nhsstaffsurveys.com)

Appendix 4

Other NHS staff survey 2017 documentation

This report is one of several ways in which we present the results of the 2017 national NHS staff survey:

1) A separate summary report of the main 2017 survey results for Lincolnshire Community Health Services NHS Trust can be downloaded from: www.nhsstaffsurveys.com. The summary report is a shorter version of this feedback report, which may be useful for wider circulation within the trust.

2) A national briefing document, describing the national Key Findings from the 2017 survey and making comparisons with previous years, will be available from www.nhsstaffsurveys.com in March 2018.

3) The document Making sense of your staff survey data, which can be downloaded from www.nhsstaffsurveys.com. This includes details about the calculation of Key Findings and the data weighting method used.

4) A series of detailed spreadsheets will be made available after publication via www.nhsstaffsurveys.com. In these detailed spreadsheets you will be able to find:
   - responses of staff in your trust to every core survey question
   - responses in every trust in England
   - the average responses for each major trust type (e.g. all acute trusts, all ambulance trusts)
   - the average responses for each major occupational and demographic group within the major trust types
